

Custom Compounds • Custom Molding • Custom Solutions

Great Lakes Rubber Company is an ISO / TS 16949 manufacturer of precision, custom molded rubber products and prototypes since 1979. We specialize in producing close tolerance dynamic seals and bonding rubber to other materials. Great Lakes Rubber is a wholly owned subsidiary of MAC Valves, Inc. since 1989.

Great Lakes Rubber is vertically integrated to provide full range of customer services including custom rubber development and mixing, rubber testing, molding, post molding secondary's, just-in-time delivery and strategic sourcing.

We invite you to consider us in helping solve your difficult rubber application problems.

800.893.3645 • 30573 Beck Road • Wixom, MI 48393

We have a variety of specialty compounds developed for use in long life dynamic applications. These compounds are designed for:

- Low or constant coefficient of friction
- Environmental resistance
- Wide temperature range performance

Our Capabilities Include:

- Product Research & Development Support
- Custom Compounding • Prototyping
- Rubber Testing • Mixing • Molding
- Form Grinding • Cryogenic Deflashing
- Assembly

Applications Include:

- Pneumatics • Vibration Control
- Noise Control / BSR • Paper Handling
- Force Transmission • Sealing

Polymers Include:

- General Purpose • Oil Resistant
- Heat Resistant
